

Penn 1 Plaza | Work Lounge

Location: Penn 1, New York
Typology: Lobby Renovation
Status: Under Construction
Size: 30,000 sq ft

The balcony at Penn 1 is a public work space that fosters a multitude of work environments. Each zone has been programmed to allow for a different work posture to attract a diverse people group to work together. The architecture complements the different interactions by creating seating types: alone together, alone and together.

I helped design the integrated work table, bookcase and railing. I created the renderings and details using Revit, Enscape and Photoshop.

A. Work Table B. Phonebooth C. Work Sofa
