

Abigail Figaro

FULL STACK DEVELOPER

PROJECTS

YelpCamp

Global Database For Reviews

VSCode | React.js | Node.js | MongoDB | Mongoose | Render

- A blog application where users can add campground information to a global map, upload photos and leave reviews.
- Developed with a focus on security, refactoring and authentication from scratch. Configured to prohibit low-level SQL-Injection & XSS.

Personal Website

Web Application For Project Archive

VSCode | React.js | Node.js | TailwindCSS | Heroku

- A web application showcasing full stack projects and programming exercises.
- Developed with a focus on security access using cookies.

EXPERIENCE

Project Coordinator | Moody Nolan

May 2022 - Present

Led design strategy development and production, capturing client's requirements and programming objectives from concept to final construction documents for institutional projects in Atlanta, New Jersey and New York.

Collaborated with multidisciplinary teams to resolve technical challenges and create contextual design solutions.

Managed the construction administration process from end-to-end for multiple banking projects simultaneously, prioritizing tasks, junior staff and deadlines to maintain project schedule and client satisfaction.

Spearheaded the production of the construction documents on Building Information Modeling BIM software with attention to detail, working closely with the Director of Architecture.

Created the narrative responsible for tracking changes in the drawings along with amendments issues in subsequent issuances.

Collaborated with the Specification writer to create project specific Project Manual document for construction.

Managed junior team members in their professional development. Identifying their current strengths and interests to expand their capabilities with intentional exercises.

Architectural Designer | Architecture + Information

April 2017 - May 2022

Developed 3D models and visuals using BIM software, showcasing creativity in visualizing architectural designs. Illustrated a solid understanding of modeling fundamentals through incorporating best practices and lessons learned through previous work in the office.

Produced high quality presentation renderings and technical drawings to communicate design concepts and construction details. Translated architectural concepts into technical drawings and specification demonstrating strong problem-solving skills.

Illustrated adaptability and willingness to learn new technologies, evidenced by successful integration of BIM software into architectural workflows.

Strong Communication skills honed through client interaction, presentations, project coordination and facilitating meetings.

SKILLS

Software Development

Programming Languages:

HTML5, CSS, JavaScript

Library and Frameworks:

Node.js, Bootstrap 4 and 5, React.js, Tailwind CSS, ExpressJS, MongoDB, Mongoose, npm, AJAX

Tools and Platforms:

Git, Github, Render, Vercel

Architecture

Revit, Sketchup, Rhino, Enscape, Maxwell, Vray, AutoCAD, Photoshop, Illustrator, Indesign, Bluebeam, Microsoft Suite, Sketching, Painting

EDUCATION

Web Developer Bootcamp

Udemy | Colt Steele

Master of Architecture

University of Virginia

Bachelor of Design

Focus in Architecture

Minor in Sustainability Studies in the Built Environment

University of Florida

Summer Studio Abroad

University of Florida | Mexico
Preservation Institute

HONORS

Interior Design NYCxDesign Winner
2023 (Commercial Lobby / Amenity Space)
Interior Design Magazine

Design Awards of Honor 2023 Finalist
(Commercial Office Repositioning)
